Understanding the Economy: State-by-State Snapshots

EXECUTIVE SUMMARY

This is the eighth edition of the state-by-state snapshots issued by the Joint Economic Committee, containing employment and unemployment data at the state level for the first seven months of 2010. While the current recovery remains fragile and uneven, as a whole, the economic situation of the country has improved over the past year:

- Gross domestic product (GDP) grew by 2.4 percent in the second quarter of 2010, marking four quarters of uninterrupted economic expansion. In contrast, GDP fell in the second quarter of 2009, which was the fourth consecutive quarter of economic contraction.
- Private sector employment rose by 630,000 jobs so far in 2010, with seven consecutive months of job gains. In contrast, employment fell by nearly 4 million jobs in the first seven months of 2009. Most recently, private sector employment rose by 71,000 jobs in July, after having fallen by 297,000 jobs in July 2009.

While these numbers suggest that the economy has started to recover, a stronger, sustained level of job creation is needed to reduce the large pool of unemployed workers. The national unemployment rate was 9.5 percent in July 2010, below the peak of 10.1 percent reached in October 2009.

Private sector job creation during the Clinton administration averaged 217,000 jobs each month. However, even with 200,000 jobs created each month, it would take over 3 years to recreate the 8.5 million private sector jobs lost from December 2007 to December 2009, so unemployment rates are likely to remain high for the foreseeable future.

This month's report shows the progress states have made creating jobs and reducing unemployment since the beginning of the year, including:

- In thirty-one states and the District of Columbia, the unemployment rate in July 2010 was lower than in December 2009.
- In eighteen states and the District of Columbia, the unemployment rate declined over the month of July 2010.¹
- Forty states and the District of Columbia added private sector jobs in July 2010 and two states – Massachusetts and Texas – added private sector jobs in each of the first seven months of 2010.
- Twenty-six states and the District of Columbia added manufacturing jobs in July 2010 and five states – New Hampshire, Florida, Tennessee, Texas and Indiana – have

¹ The decline in the unemployment rate was statistically significant for four states: Alabama, Nebraska, North Carolina, and Tennessee.

experienced growth in manufacturing employment in each of the first seven months of 2010.

- Twenty-eight states and the District of Columbia added jobs in the professional and business services sector during July 2010, with Texas alone gaining jobs in this sector in each of the first seven months of 2010.

For the United States as a whole, employment has grown in the manufacturing, professional and business services, and leisure and hospitality sectors.² One particularly bright spot in recent months has been the expanding payrolls within the manufacturing sector. The U.S. manufacturing sector has shown tentative signs of progress in 2010, after unrelenting employment losses starting in February 2007. The manufacturing sector has added jobs in every month of 2010 so far, adding a total of 183,000 jobs in the first seven months of 2010. The last time that the U.S. saw more than one consecutive month of manufacturing employment gains was between December 2005 and April 2006, when 51,000 jobs were added. The attached table shows how this national progress also shows up at the state level. However, employment in the manufacturing sector remains fragile. July's gain of 36,000 manufacturing jobs followed a gain of only 13,000 jobs in June – a strong sign that a recovery in the manufacturing sector, and the whole labor market, will be bumpy.

In addition, in order to provide a clearer picture of economic performance at a more local level, the Joint Economic Committee has prepared a snapshot of the current economic climate within each state. The attached state pages highlight key economic statistics for each state:

- Jobs created or lost since the start of the recession;
- Jobs saved or created by the Recovery Act;
- Unemployment rates;
- Per capita earnings; and,
- The condition of the housing sector.

The reports provide an easy way for state residents to see how their state is currently performing relative to the rest of the United States in terms of the current unemployment rate as well as the magnitude of job losses experienced since the start of the recession. In response to the severity of the Great Recession, Congress strengthened the safety net for those whose jobs were eliminated during this recession by passing a series of extensions to unemployment benefits. As the recession has continued to take its toll on working families, a number of emergency extensions have been provided to continue this safety net. Most recently, Congress moved to extend the existing tiers of benefits retroactively until November 30, 2010. While the road to economic recovery remains slow and uneven, it is clear that the swift action taken by Congress and the President in February 2009 brought the economy back from the brink of another Great Depression. The Recovery Act is responsible for restoring economic growth in the second half of 2009, boosting employment, and laying the groundwork for additional job creation and growth. That recovery has continued, with GDP growth of 2.4 percent in the second quarter of 2010. However, high unemployment rates, particularly long-term unemployment rates, suggest that targeted actions are warranted to create jobs and to continue providing a safety net for families hurt by the recession.

² Employment has also grown in the following sectors: mining and logging; trade, transportation and utilities; education and health services; other; and government.

U.S. Congress Joint Economic Committee

Economic Overview And Outlook: Alabama

JOBS

- Across the country, the private sector gained jobs in each month of 2010.
- The President's Council of Economic Advisers estimates that investments made through the Recovery Act have boosted employment in Alabama by 42,000 jobs through the 2nd quarter of 2010.
- In Alabama, private sector employment fell by 9.7 percent from December 2007 to December 2009. In 2010, private sector employment grew by 0.8 percent.
- In Alabama, employees in the construction, information services, and professional and business services sectors faced the largest job losses (as a percent of employment within an industry) over the recession. In 2010, the following sectors in Alabama experienced the greatest employment increases: leisure and hospitality; other services; and construction.*
- As the economy recovers from the Great Recession, service-providing industries are projected to add the most jobs between 2008 and 2018, with the largest gains in professional and business services, education, health care and social assistance, and State and local government. Within the goods-producing sector of the economy, only the construction industry is projected to add jobs above its 2008 level.

EMPLOYMENT

- The unemployment rate in Alabama was 9.7 percent in July 2010, up 5.8 percentage points from December 2007, but down from its most recent peak of 11.1 percent reached in February 2010.
- 203,000 Alabama residents were counted among the unemployed in Alabama during July 2010.

EARNINGS

- Between the start of the recession in the 4th quarter of 2007 and the 1st quarter of 2009, inflation-adjusted total personal income in the United States declined 2.5 percent. Most recently, in the 1st quarter of 2010, total personal income remained 2.6 percent below the 4th quarter 2007 peak.

- Real per capita personal income (in 2005 \$) in Alabama was \$30,297.10 in the 1st quarter of 2010, down from \$30,946.00 in the 1st quarter of 2008.

HOUSING

- National home prices, including distressed sales, saw an increase of 1.4 percent in June 2010 from June 2009 compared to 3.7 percent in May. In Alabama, home prices saw a decrease of 3.8 percent in June 2010 from June 2009 following May's year over year decrease of 4.9 percent.
- The median price of single-family homes in Alabama was \$203,500 in 2008, compared to \$250,000 nationwide.
- As of the 1st quarter of 2010, 2.2 percent of all mortgages, including 7.5 percent of subprime mortgages, were in foreclosure in Alabama.
- Housing starts in Alabama totaled 7,780 units (seasonally adjusted annual rate) in June 2010, a decrease of 34.8 percent from May.
- Within the South census region, which includes Alabama, sales of new single-family homes totaled 185,000 units in June 2010, an increase of 33.1 percent from May. Sales of existing single-family homes decreased 6.7 percent to 1,810,000 units (at seasonally adjusted annual rates) from May to June 2010.

How Does Alabama Compare To Other States?

Workers across the country have been hard hit by the Great Recession. This chart allows you to compare Alabama to other states using two metrics.

The current unemployment rate (measured along the horizontal axis) serves as a gauge of current labor market conditions faced by residents, while the proportion of jobs lost within Alabama over the course of the recession (shown along the vertical axis) measures the toll the recession has taken on the job supply in Alabama.

States falling in the upper right quadrant have lost a disproportionate share of jobs, relative to the total United States, and have unemployment rates higher than the national unemployment rate. States falling in the lower left quadrant have unemployment rates lower than the national average and smaller job losses over the recession.

STATE QUICK FACTS

		Alabama	United States
Unemployment Rates	July 2008	5.1%	5.8%

Economic Overview And Outlook: Alaska

JOBS

- Across the country, the private sector gained jobs in each month of 2010.
- The President's Council of Economic Advisers estimates that investments made through the Recovery Act have boosted employment in Alaska by 7,000 jobs through the 2nd quarter of 2010.
- In Alaska, private sector employment fell by 0.1 percent from December 2007 to December 2009. In 2010, private sector employment grew by 1.3 percent.
- In Alaska, employees in the information services, financial activities, and construction sectors faced the largest job losses (as a percent of employment within an industry) over the recession. In 2010, the following sectors in Alaska experienced the greatest employment increases: manufacturing; mining; and construction.*
- As the economy recovers from the Great Recession, service-providing industries are projected to add the most jobs between 2008 and 2018, with the largest gains in professional and business services, education, health care and social assistance, and State and local government. Within the goods-producing sector of the economy, only the construction industry is projected to add jobs above its 2008 level.

EMPLOYMENT

- The unemployment rate in Alaska was 7.7 percent in July 2010, up 1.5 percentage points from December 2007, but down from its most recent peak of 8.6 percent reached in December 2009.
- 28,000 Alaska residents were counted among the unemployed in Alaska during July 2010.

EARNINGS

- Between the start of the recession in the 4th quarter of 2007 and the 1st quarter of 2009, inflation-adjusted total personal income in the United States declined 2.5 percent. Most recently, in the 1st quarter of 2010, total personal income remained 2.6 percent below the 4th quarter 2007 peak.

- Real per capita personal income (in 2005 \$) in Alaska was \$39,251.70 in the 1st quarter of 2010, down from \$40,205.60 in the 1st quarter of 2008.

HOUSING

- National home prices, including distressed sales, saw an increase of 1.4 percent in June 2010 from June 2009 compared to 3.7 percent in May. In Alaska, home prices saw an increase of 0.5 percent in June 2010 from June 2009 following May's year over year decrease of 1.6 percent.
- The median price of single-family homes in Alaska was \$251,100 in 2008, compared to \$250,000 nationwide.
- As of the 1st quarter of 2010, 1.3 percent of all mortgages, including 4.1 percent of subprime mortgages, were in foreclosure in Alaska.
- Housing starts in Alaska totaled 960 units (seasonally adjusted annual rate) in June 2010, a decrease of 47.3 percent from May.
- Within the West census region, which includes Alaska, sales of new single-family homes totaled 57,000 units in June 2010, a decrease of 6.6 percent from May. Sales of existing single-family homes decreased 8.5 percent to 1,070,000 units (at seasonally adjusted annual rates) from May to June 2010.

Economic Overview And Outlook: Arizona

JOBS

- Across the country, the private sector gained jobs in each month of 2010.
- The President's Council of Economic Advisers estimates that investments made through the Recovery Act have boosted employment in Arizona by 64,000 jobs through the 2nd quarter of 2010.
- In Arizona, private sector employment fell by 12.2 percent from December 2007 to December 2009. In 2010, private sector employment grew by 0.8 percent.
- In Arizona, employees in the construction, manufacturing, and professional and business services sectors faced the largest job losses (as a percent of employment within an industry) over the recession. In 2010, the following sectors in Arizona experienced the greatest employment increases: mining; other services; and manufacturing.*
- As the economy recovers from the Great Recession, service-providing industries are projected to add the most jobs between 2008 and 2018, with the largest gains in professional and business services, education, health care and social assistance, and State and local government. Within the goods-producing sector of the economy, only the construction industry is projected to add jobs above its 2008 level.

EMPLOYMENT

- The unemployment rate in Arizona was 9.6 percent in July 2010, up 5.3 percentage points from December 2007, matching its most recent peak reached in June 2010.
- 306,000 Arizona residents were counted among the unemployed in Arizona during July 2010.

EARNINGS

- Between the start of the recession in the 4th quarter of 2007 and the 1st quarter of 2009, inflation-adjusted total personal income in the United States declined 2.5 percent. Most recently, in the 1st quarter of 2010, total personal income remained 2.6 percent below the 4th quarter 2007 peak.

- Real per capita personal income (in 2005 \$) in Arizona was \$29,900.30 in the 1st quarter of 2010, down from \$31,986.40 in the 1st quarter of 2008.

HOUSING

- National home prices, including distressed sales, saw an increase of 1.4 percent in June 2010 from June 2009 compared to 3.7 percent in May. In Arizona, home prices saw a decrease of 2.0 percent in June 2010 from June 2009 following May's year over year increase of 0.6 percent.
- The median price of single-family homes in Arizona was \$240,000 in 2008, compared to \$250,000 nationwide.
- As of the 1st quarter of 2010, 5.9 percent of all mortgages, including 16.4 percent of subprime mortgages, were in foreclosure in Arizona.
- Housing starts in Arizona totaled 9,640 units (seasonally adjusted annual rate) in June 2010, a decrease of 14.8 percent from May.
- Within the West census region, which includes Arizona, sales of new single-family homes totaled 57,000 units in June 2010, a decrease of 6.6 percent from May. Sales of existing single-family homes decreased 8.5 percent to 1,070,000 units (at seasonally adjusted annual rates) from May to June 2010.

Economic Overview And Outlook: California

JOBS

- Across the country, the private sector gained jobs in each month of 2010.
- The President's Council of Economic Advisers estimates that investments made through the Recovery Act have boosted employment in California by 357,000 jobs through the 2nd quarter of 2010.
- In California, private sector employment fell by 10.5 percent from December 2007 to December 2009. In 2010, private sector employment grew by 0.6 percent.
- In California, employees in the construction, manufacturing, and trade, transportation and utilities sectors faced the largest job losses (as a percent of employment within an industry) over the recession. In 2010, the following sectors in California experienced the greatest employment increases: mining; other services; and education and health services.*
- As the economy recovers from the Great Recession, service-providing industries are projected to add the most jobs between 2008 and 2018, with the largest gains in professional and business services, education, health care and social assistance, and State and local government. Within the goods-producing sector of the economy, only the construction industry is projected to add jobs above its 2008 level.

EMPLOYMENT

- The unemployment rate in California was 12.3 percent in July 2010, up 6.5 percentage points from December 2007, but down from its most recent peak of 12.6 percent reached in March 2010.
- 2,251,000 California residents were counted among the unemployed in California during July 2010.

EARNINGS

- Between the start of the recession in the 4th quarter of 2007 and the 1st quarter of 2009, inflation-adjusted total personal income in the United States declined 2.5 percent. Most recently, in the 1st quarter of 2010, total personal income remained 2.6 percent below the 4th quarter 2007 peak.

- Real per capita personal income (in 2005 \$) in California was \$38,384.50 in the 1st quarter of 2010, down from \$40,463.90 in the 1st quarter of 2008.

HOUSING

- National home prices, including distressed sales, saw an increase of 1.4 percent in June 2010 from June 2009 compared to 3.7 percent in May. In California, home prices saw a significant improvement of 5.9 percent in June 2010 from June 2009 following May's year over year significant increase of 8.2 percent.
- The median price of single-family homes in California was \$400,000 in 2008, compared to \$250,000 nationwide.
- As of the 1st quarter of 2010, 5.2 percent of all mortgages, including 16.9 percent of subprime mortgages, were in foreclosure in California.
- Housing starts in California totaled 39,340 units (seasonally adjusted annual rate) in June 2010, an increase of 7.7 percent from May.
- Within the West census region, which includes California, sales of new single-family homes totaled 57,000 units in June 2010, a decrease of 6.6 percent from May. Sales of existing single-family homes decreased 8.5 percent to 1,070,000 units (at seasonally adjusted annual rates) from May to June 2010.

Economic Overview And Outlook: Colorado

JOBS

- Across the country, the private sector gained jobs in each month of 2010.
- The President's Council of Economic Advisers estimates that investments made through the Recovery Act have boosted employment in Colorado by 50,000 jobs through the 2nd quarter of 2010.
- In Colorado, private sector employment fell by 8.0 percent from December 2007 to December 2009. In 2010, private sector employment was basically unchanged.
- In Colorado, employees in the construction, manufacturing, and mining sectors faced the largest job losses (as a percent of employment within an industry) over the recession. In 2010, the following sectors in Colorado experienced the greatest employment increases: education and health services; leisure and hospitality; and trade, transportation and utilities.*
- As the economy recovers from the Great Recession, service-providing industries are projected to add the most jobs between 2008 and 2018, with the largest gains in professional and business services, education, health care and social assistance, and State and local government. Within the goods-producing sector of the economy, only the construction industry is projected to add jobs above its 2008 level.

EMPLOYMENT

- The unemployment rate in Colorado was 8.0 percent in July 2010, up 3.7 percentage points from December 2007, but down from its most recent peak of 8.3 percent reached in June 2009.
- 213,000 Colorado residents were counted among the unemployed in Colorado during July 2010.

EARNINGS

- Between the start of the recession in the 4th quarter of 2007 and the 1st quarter of 2009, inflation-adjusted total personal income in the United States declined 2.5 percent. Most recently, in the 1st quarter of 2010, total personal income remained 2.6 percent below the 4th quarter 2007 peak.

- Real per capita personal income (in 2005 \$) in Colorado was \$37,177.20 in the 1st quarter of 2010, down from \$39,943.60 in the 1st quarter of 2008.

HOUSING

- National home prices, including distressed sales, saw an increase of 1.4 percent in June 2010 from June 2009 compared to 3.7 percent in May. In Colorado, home prices saw an increase of 0.7 percent in June 2010 from June 2009 following May's year over year significant increase of 2.6 percent.
- The median price of single-family homes in Colorado was \$237,400 in 2008, compared to \$250,000 nationwide.
- As of the 1st quarter of 2010, 2.8 percent of all mortgages, including 9.9 percent of subprime mortgages, were in foreclosure in Colorado.
- Housing starts in Colorado totaled 8,310 units (seasonally adjusted annual rate) in June 2010, a decrease of 11.7 percent from May.
- Within the West census region, which includes Colorado, sales of new single-family homes totaled 57,000 units in June 2010, a decrease of 6.6 percent from May. Sales of existing single-family homes decreased 8.5 percent to 1,070,000 units (at seasonally adjusted annual rates) from May to June 2010.

How Does Colorado Compare To Other States?

Workers across the country have been hard hit by the Great Recession. This chart allows you to compare Colorado to other states using two metrics.

The current unemployment rate (measured along the horizontal axis) serves as a gauge of current labor market conditions faced by residents, while the proportion of jobs lost within Colorado over the course of the recession (shown along the vertical axis) measures the toll the recession has taken on the job supply in Colorado.

States falling in the upper right quadrant have lost a disproportionate share of jobs, relative to the total United States, and have unemployment rates higher than the national unemployment rate. States falling in the lower left quadrant have unemployment rates lower than the national average and smaller job losses over the recession.

Economic Overview And Outlook: Hawaii

JOBS

- Across the country, the private sector gained jobs in each month of 2010.
- The President's Council of Economic Advisers estimates that investments made through the Recovery Act have boosted employment in Hawaii by 13,000 jobs through the 2nd quarter of 2010.
- In Hawaii, private sector employment fell by 8.3 percent from December 2007 to December 2009. In 2010, private sector employment grew by 1.1 percent.
- In Hawaii, employees in the construction, professional and business services, and financial activities sectors faced the largest job losses (as a percent of employment within an industry) over the recession. In 2010, the following sectors in Hawaii experienced the greatest employment increases: education and health services; leisure and hospitality; and trade, transportation and utilities.*
- As the economy recovers from the Great Recession, service-providing industries are projected to add the most jobs between 2008 and 2018, with the largest gains in professional and business services, education, health care and social assistance, and State and local government. Within the goods-producing sector of the economy, only the construction industry is projected to add jobs above its 2008 level.

EMPLOYMENT

- The unemployment rate in Hawaii was 6.3 percent in July 2010, up 3.3 percentage points from December 2007, but down from its most recent peak of 7.0 percent reached in September 2009.
- 40,000 Hawaii residents were counted among the unemployed in Hawaii during July 2010.

EARNINGS

- Between the start of the recession in the 4th quarter of 2007 and the 1st quarter of 2009, inflation-adjusted total personal income in the United States declined 2.5 percent. Most recently, in the 1st quarter of 2010, total personal income remained 2.6 percent below the 4th quarter 2007 peak.

- Real per capita personal income (in 2005 \$) in Hawaii was \$38,436.00 in the 1st quarter of 2010, down from \$38,810.30 in the 1st quarter of 2008.

HOUSING

- National home prices, including distressed sales, saw an increase of 1.4 percent in June 2010 from June 2009 compared to 3.7 percent in May. In Hawaii, home prices saw an increase of 0.7 percent in June 2010 from June 2009 following May's year over year significant increase of 4.1 percent.
- The median price of single-family homes in Hawaii was \$450,000 in 2008, compared to \$250,000 nationwide.
- As of the 1st quarter of 2010, 4.8 percent of all mortgages, including 20.0 percent of subprime mortgages, were in foreclosure in Hawaii.
- Housing starts in Hawaii totaled 1,450 units (seasonally adjusted annual rate) in June 2010, a decrease of 72.6 percent from May.
- Within the West census region, which includes Hawaii, sales of new single-family homes totaled 57,000 units in June 2010, a decrease of 6.6 percent from May. Sales of existing single-family homes decreased 8.5 percent to 1,070,000 units (at seasonally adjusted annual rates) from May to June 2010.

How Does Hawaii Compare To Other States?

Workers across the country have been hard hit by the Great Recession. This chart allows you to compare Hawaii to other states using two metrics.

The current unemployment rate (measured along the horizontal axis) serves as a gauge of current labor market conditions faced by residents, while the proportion of jobs lost within Hawaii over the course of the recession (shown along the vertical axis) measures the toll the recession has taken on the job supply in Hawaii.

States falling in the upper right quadrant have lost a disproportionate share of jobs, relative to the total United States, and have unemployment rates higher than the national unemployment rate. States falling in the lower left quadrant have unemployment rates lower than the national average and smaller job losses over the recession.

STATE QUICK FACTS

- Across the country, the private sector gained jobs in each month of 2010.
- The President's Council of Economic Advisers estimates that investments made through the Recovery Act have boosted employment in Kentucky by 41,000 jobs through the 2nd quarter of 2010.
- In Kentucky, private sector employment fell by 6.8 percent from December 2007 to December 2009. In 2010, private sector employment grew by 0.6 percent.
- In Kentucky, employees in the construction, manufacturing, and information services sectors faced the largest job losses (as a percent of employment within an industry) over the recession. In 2010, the following sectors in Kentucky experienced the greatest employment increases: trade, transportation and utilities; mining; and manufacturing.*
- As the economy recovers from the Great Recession, service-providing industries are projected to add the most jobs between 2008 and 2018, with the largest gains in professional and business services, education, health care and social assistance, and State and local government. Within the goods-producing sector of the economy, only the construction industry is projected to add jobs above its 2008 level.

EMPLOYMENT

- The unemployment rate in Kentucky was 9.9 percent in July 2010, up 4.4 percentage points from December 2007, but down from its most recent peak of 10.9 percent reached in February 2010.
- 203,000 Kentucky residents were counted among the unemployed in Kentucky during July 2010.

EARNINGS

- Between the start of the recession in the 4th quarter of 2007 and the 1st quarter of 2009, inflation-adjusted total personal income in the United States declined 2.5 percent. Most recently, in the 1st quarter of 2010, total personal income remained 2.6 percent below the 4th quarter 2007 peak.

- Real per capita personal income (in 2005 \$) in Kentucky was \$29,377.40 in the 1st quarter of 2010, up from \$29,332.40 in the 1st quarter of 2008.

HOUSING

- National home prices, including distressed sales, saw an increase of 1.4 percent in June 2010 from June 2009 compared to 3.7 percent in May. In Kentucky, home prices saw an increase of 0.4 percent in June 2010 from June 2009 following May's year over year increase of 1.2 percent.
- The median price of single-family homes in Kentucky was \$172,500 in 2008, compared to \$250,000 nationwide.
- As of the 1st quarter of 2010, 3.3 percent of all mortgages, including 11.5 percent of subprime mortgages, were in foreclosure in Kentucky.
- Housing starts in Kentucky totaled 6,080 units (seasonally adjusted annual rate) in June 2010, an increase of 1.3 percent from May.
- Within the South census region, which includes Kentucky, sales of new single-family homes totaled 185,000 units in June 2010, an increase of 33.1 percent from May. Sales of existing single-family homes decreased 6.7 percent to 1,810,000 units (at seasonally adjusted annual rates) from May to June 2010.

How Does Kentucky Compare To Other States?

Workers across the country have been hard hit by the Great Recession. This chart allows you to compare Kentucky to other states using two metrics.

The current unemployment rate (measured along the horizontal axis) serves as a gauge of current labor market conditions faced by residents, while the proportion of jobs lost within Kentucky over the course of the recession (shown along the vertical axis) measures the toll the recession has taken on the job supply in Kentucky.

States falling in the upper right quadrant have lost a disproportionate share of jobs, relative to the total United States, and have unemployment rates higher than the national unemployment rate. States falling in the lower left quadrant have unemployment rates lower than the national average and smaller job losses over the recession.

How Does Minnesota Compare To Other States?

Workers across the country have been hard hit by the Great Recession. This chart allows you to compare Minnesota to other states using two metrics.

The current unemployment rate (measured along the horizontal axis) serves as a gauge of current labor market conditions faced by residents, while the proportion of jobs lost within Minnesota over the course of the recession (shown along the vertical axis) measures the toll the recession has taken on the job supply in Minnesota.

States falling in the upper right quadrant have lost a disproportionate share of jobs, relative to the total United States, and have unemployment rates higher than the national unemployment rate. States falling in the lower left quadrant have unemployment rates lower than the national average and smaller job losses over the recession.

How Does New Hampshire Compare To Other States?

Workers across the country have been hard hit by the Great Recession. This chart allows you to compare New Hampshire to other states using two metrics.

The current unemployment rate (measured along the horizontal axis) serves as a gauge of current labor market conditions faced by residents, while the proportion of jobs lost within New Hampshire over the course of the recession (shown along the vertical axis) measures the toll the recession has taken on the job supply in New Hampshire.

States falling in the upper right quadrant have lost a disproportionate share of jobs, relative to the total United States, and have unemployment rates higher than the national unemployment rate. States falling in the lower left quadrant have unemployment rates lower than the national average and smaller job losses over the recession.

How Does Ohio Compare To Other States?

Workers across the country have been hard hit by the Great Recession. This chart allows you to compare Ohio to other states using two metrics.

The current unemployment rate (measured along the horizontal axis) serves as a gauge of current labor market conditions faced by residents, while the proportion of jobs lost within Ohio over the course of the recession (shown along the vertical axis) measures the toll the recession has taken on the job supply in Ohio.

States falling in the upper right quadrant have lost a disproportionate share of jobs, relative to the total United States, and have unemployment rates higher than the national unemployment rate. States falling in the lower left quadrant have unemployment rates lower than the national average and smaller job losses over the recession.

Economic Overview And Outlook: Oklahoma

JOBS

- Across the country, the private sector gained jobs in each month of 2010.
- The President's Council of Economic Advisers estimates that investments made through the Recovery Act have boosted employment in Oklahoma by 35,000 jobs through the 2nd quarter of 2010.
- In Oklahoma, private sector employment fell by 5.5 percent from December 2007 to December 2009. In 2010, private sector employment grew by 2.1 percent.
- In Oklahoma, employees in the manufacturing, professional and business services, and other services sectors faced the largest job losses (as a percent of employment within an industry) over the recession. In 2010, the following sectors in Oklahoma experienced the greatest employment increases: mining; construction; and professional and business services.*
- As the economy recovers from the Great Recession, service-providing industries are projected to add the most jobs between 2008 and 2018, with the largest gains in professional and business services, education, health care and social assistance, and State and local government. Within the goods-producing sector of the economy, only the construction industry is projected to add jobs above its 2008 level.

EMPLOYMENT

- The unemployment rate in Oklahoma was 6.9 percent in July 2010, up 3.3 percentage points from December 2007, matching its most recent peak reached in October 2009.
- 121,000 Oklahoma residents were counted among the unemployed in Oklahoma during July 2010.

EARNINGS

- Between the start of the recession in the 4th quarter of 2007 and the 1st quarter of 2009, inflation-adjusted total personal income in the United States declined 2.5 percent. Most recently, in the 1st quarter of 2010, total personal income remained 2.6 percent below the 4th quarter 2007 peak.

- Real per capita personal income (in 2005 \$) in Oklahoma was \$31,926.10 in the 1st quarter of 2010, down from \$32,798.20 in the 1st quarter of 2008.

HOUSING

- National home prices, including distressed sales, saw an increase of 1.4 percent in June 2010 from June 2009 compared to 3.7 percent in May. In Oklahoma, home prices saw an increase of 1.7 percent in June 2010 from June 2009 following May's year over year increase of 1.6 percent.
- The median price of single-family homes in Oklahoma was \$149,500 in 2008, compared to \$250,000 nationwide.
- As of the 1st quarter of 2010, 3.0 percent of all mortgages, including 9.6 percent of subprime mortgages, were in foreclosure in Oklahoma.
- Housing starts in Oklahoma totaled 7,370 units (seasonally adjusted annual rate) in June 2010, a decrease of 14.7 percent from May.
- Within the South census region, which includes Oklahoma, sales of new single-family homes totaled 185,000 units in June 2010, an increase of 33.1 percent from May. Sales of existing single-family homes decreased 6.7 percent to 1,810,000 units (at seasonally adjusted annual rates) from May to June 2010.

How Does South Dakota Compare To Other States?

Workers across the country have been hard hit by the Great Recession. This chart allows you to compare South Dakota to other states using two metrics.

The current unemployment rate (measured along the horizontal axis) serves as a gauge of current labor market conditions faced by residents, while the proportion of jobs lost within South Dakota over the course of the recession (shown along the vertical axis) measures the toll the recession has taken on the job supply in South Dakota.

States falling in the upper right quadrant have lost a disproportionate share of jobs, relative to the total United States, and have unemployment rates higher than the national unemployment rate. States falling in the lower left quadrant have unemployment rates lower than the national average and smaller job losses over the recession.

How Does Washington Compare To Other States?

Workers across the country have been hard hit by the Great Recession. This chart allows you to compare Washington to other states using two metrics.

The current unemployment rate (measured along the horizontal axis) serves as a gauge of current labor market conditions faced by residents, while the proportion of jobs lost within Washington over the course of the recession (shown along the vertical axis) measures the toll the recession has taken on the job supply in Washington.

States falling in the upper right quadrant have lost a disproportionate share of jobs, relative to the total United States, and have unemployment rates higher than the national unemployment rate. States falling in the lower left quadrant have unemployment rates lower than the national average and smaller job losses over the recession.

STATE QUICK FACTS

Economic Overview And Outlook: West Virginia

JOBS

- Across the country, the private sector gained jobs in each month of 2010.
- The President's Council of Economic Advisers estimates that investments made through the Recovery Act have boosted employment in West Virginia by 16,000 jobs through the 2nd quarter of 2010.
- In West Virginia, private sector employment fell by 5.0 percent from December 2007 to December 2009. In 2010, private sector employment grew by 1.2 percent.
- In West Virginia, employees in the manufacturing, construction, and financial activities sectors faced the largest job losses (as a percent of employment within an industry) over the recession. In 2010, the following sectors in West Virginia experienced the greatest employment increases: mining; leisure and hospitality; and manufacturing.*
- As the economy recovers from the Great Recession, service-providing industries are projected to add the most jobs between 2008 and 2018, with the largest gains in professional and business services, education, health care and social assistance, and State and local government. Within the goods-producing sector of the economy, only the construction industry is projected to add jobs above its 2008 level.

EMPLOYMENT

- The unemployment rate in West Virginia was 8.6 percent in July 2010, up 4.6 percentage points from December 2007, but down from its most recent peak of 9.5 percent reached in March 2010.
- 67,000 West Virginia residents were counted among the unemployed in West Virginia during July 2010.

EARNINGS

- Between the start of the recession in the 4th quarter of 2007 and the 1st quarter of 2009, inflation-adjusted total personal income in the United States declined 2.5 percent. Most recently, in the 1st quarter of 2010, total personal income remained 2.6 percent below the 4th quarter 2007 peak.

- Real per capita personal income (in 2005 \$) in West Virginia was \$29,407.70 in the 1st quarter of 2010, up from \$28,666.50 in the 1st quarter of 2008.

HOUSING

- National home prices, including distressed sales, saw an increase of 1.4 percent in June 2010 from June 2009 compared to 3.7 percent in May. In West Virginia, home prices saw a decrease of 1.3 percent in June 2010 from June 2009 following May's year over year decrease of 3.0 percent.
- The median price of single-family homes in West Virginia was \$165,000 in 2008, compared to \$250,000 nationwide.
- As of the 1st quarter of 2010, 2.2 percent of all mortgages, including 6.6 percent of subprime mortgages, were in foreclosure in West Virginia.
- Housing starts in West Virginia totaled 2,670 units (seasonally adjusted annual rate) in June 2010, an increase of 128.2 percent from May.
- Within the South census region, which includes West Virginia, sales of new single-family homes totaled 185,000 units in June 2010, an increase of 33.1 percent from May. Sales of existing single-family homes decreased 6.7 percent to 1,810,000 units (at seasonally adjusted annual rates) from May to June 2010.

EXPLANATION OF NET JOB LOSS AND UNEMPLOYMENT RATE CHART

The chart on the following page shows a comparison of the current (July 2010) unemployment rate and cumulative nonfarm job losses (as a percent of total employment) in each state and the District of Columbia versus the national average. States that appear in the upper right quadrant are experiencing unemployment rates higher than the national average and cumulative job losses greater than the national average. Most of these states were dependent on manufacturing and construction. States in the lower left quadrant are experiencing lower unemployment rates and smaller job losses than the national average.

States in the upper left quadrant experienced net job losses greater than the national average but have a current unemployment rate lower than the national average. Those states all started the recession with unemployment rates less than the national average.

Negative job losses correspond to job creation during the recession, as seen in North Dakota, Alaska and the District of Columbia. North Dakota and Alaska expanded employment in the natural resource and mining sector and education and health services sector during the recession. In addition, both states and the District of Columbia saw gains in government jobs during the recession. These job gains outweighed losses in the other sectors. Despite job gains, the unemployment rate in the District of Columbia is currently higher than the national average. The higher unemployment rate in District of Columbia is partly due to a higher unemployment rate before the recession began – the unemployment rate was 5.7 percent in November 2007, above the national average of 4.7 percent. It is likely, given the small size of the District of Columbia, that jobs created in the District of Columbia are filled by Virginia and Maryland residents.

Unemployment rate above national rate;
Job losses larger than US total

Unemployment rate below national rate;
Job losses larger than US total

**United States:
9.5% Unemployment;
Job losses totaling 5.6%**
